INTRODUCTION

COOLEX High Efficiency Low Static Fan Coil Units are highly efficient means of turning a water chiller, heat pump or hot water boiler into an efficient quiet air conditioning system with high performance, low

power consumption, easy installation "and low noise operation for both commercial and residential applications applications."

NOMENCLATURE

STANDARD SPECIFICATIONS

General

Fan coil units are provided with the latest advanced technology to provide quiet, reliable performance. Chilled water coils are designed to give optimum heat transfer efficiency. Units casings designed to provide easy accessibility for Chilled water coil and unit fan deck.

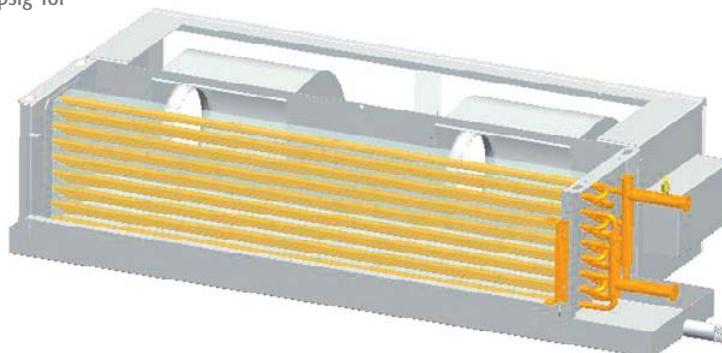

Unit Construction

Fan Coil unit consists of a coil, motor/blower assembly and a drain pan securely mounted on heavy gauge galvanized steel housing.

Evaporator Coils

High heat transfer efficiency coils are built up of ripple finned seamless copper tubes and mechanically bonded to scientifically design louvered fins.

The assembled coils are factory leak tested under water at a pressure of 350 psig for quality and leak free units.

Drain Pan

Drain Pan is constructed from a one piece painted galvanized sheet metal welded carefully to protect from leakage.

The insulation shall be special designed to be perfect

Blower Assembly

The units are provided with new designed low speed and Wide impellers centrifugal fan which are statically and dynamically balanced, designed for low sound level operation

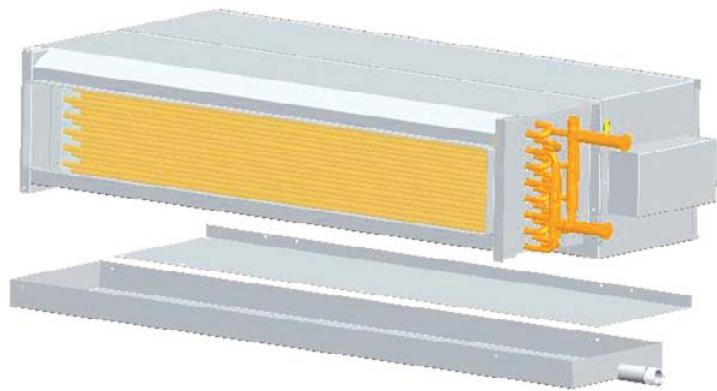

Blower Motor

Motors are of permanent split capacitor type of maximum efficiency and minimum noise with permanently lubricated, sealed sleeve bearings.

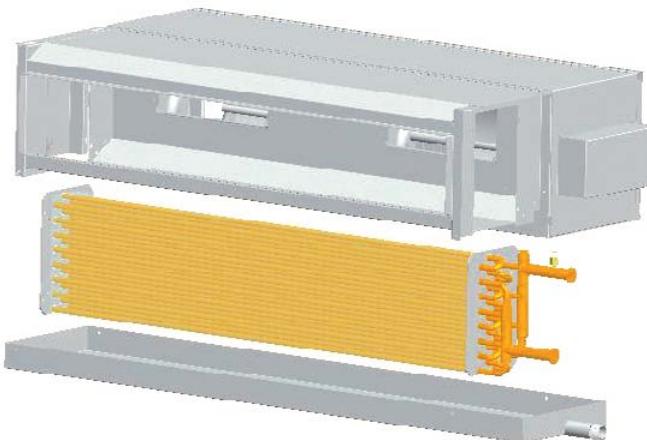

Smart construction design and insulation with good noise elimination effect make the unit most lowest noise level.

SELECTION PROCEDURE

The below example illustrates the selection procedure to assist using this catalog to select the appropriate FCL unit that meets the design requirements.

Example :

Design requirements

- Total cooling capacity 19 [MBH]
- Sensible cooling capacity 13.5 [MBH]
- Air flow rate 700 [CFM]
- Entering Air temperature DB/WB 80/67 [°F/°F]
- Entering Water temperature 45 [°F]
- External static pressure 0.1 [in.wg]
- Altitude 2000 [ft]
- Power supply 220 V/ 50 Hz/ 1 PH

Altitude [ft]	Correction factor
Sea level	1
1000	0.996
2000	0.990
3000	0.984
4000	0.980
5000	0.974
6000	0.965
7000	0.960

From the performance Table:

*Using the correction factor table at the specified altitude, thereby the required capacity will be:

Corrected capacity

= Required capacity
/corr. factor

Corrected total capacity

= 19000 (Btu/hr)/.99
= 19192 (Btu/hr)

Corrected sensible capacity

= 13500 (Btu/hr)/.99
= 13636 (Btu/hr)

From supply air performance (page 8) & the cooling capacity data (page 9) the closest selection model to the required Capacity is FCL-08

Total capacity

= 20189 [Btu/hr]

Sensible capacity

= 14218 [Btu/hr]

About RIC

Refrigeration Industries Company (KSE 504) is a group holding company with diversified interests in manufacturing, contracting and services. Recognized regionally for our engineering capabilities and management excellence, RIC and its subsidiaries offer a wide range of high quality products and services that cater to both residential and commercial customers, in the areas of climate control technologies and specialized storage solutions.

In view of the growing Kuwait infrastructure and the limitations imposed on it by the country's arid climate, the Refrigeration Industries Company was established 40 years ago in 1973, by Amiri Decree. The company's operations began with the construction of the first cold stores in the region, to enable the storage of the imported foods, on which Kuwait relied. Along with the development and advancement of the country, so has RIC prospered and expanded, and is now a milestone in the history of modern Kuwait.

RIC takes pride in its successful record and the many accolades it has garnered over time, but the greatest achievement has been the provision of comfort and protection from the harsh climate, to the people of Kuwait.

More than 40 years of uninterrupted service, overcoming extreme weather conditions, war, economic recessions and ever increasing competition, is testimony to the fact that RIC has met the expectations and responsibilities that was envisioned at the beginning and also highlights the tenacity and vision to exceed them in the future.
